Creating text boxes and adding pictures to the body of your supermon page
WROG208
www.lonewolfsystem.org

Picture 1

I added some text boxes to announce special events and news. They can be permanent or just display when you like.

I also added a QR code for our new zello channel. I will try to separate each part into its own explanation, text boxes, pictures and text. In case you just want to use one or the other.

Let's start with the text boxes.

We will be working with the file **link.php** you will find it in **/srv/http/supermon**. Open the file and scroll all the way to the bottom and look for the line in the picture 2.

Picture 2

```
        <tr><th colspan="7"><i><?php echo $title; ?></i></th></tr>

        <tr><th>Node</th><th>Node Information</th><th>Received</th><th>Link</th><th>Direction</th><th>Connected</th><th>Mode</th></tr>
        </thead>
        <tbody>
        <tr><td colspan="7">   Waiting...</td></tr>
        </tbody>
        </table><br />
<?php
}
?>

</div>
<div id="spinny">
</div>
<?php include "footer.inc"; ?>
```

Right after **?>** make a space to insert the code. Where the blue box is.
The code for the boxes below. Copy and paste.
</div>
</div>
</div>
</div>
<table class=gridtable width='52%' align='center'>
<tr><th colspan="7"><h3>**YOUR TEXT FOR THE BOX**</h3> </th></tr>
</div>
You can make it smaller or wider just adjust the "width=52%' to whatever you need. You will have to experiment with that.
That will make 1 box with the text that you input on the **YOUR TEXT FOR THE BOX** if you need or want more than 1 line, write the first line and were you want it to end and start the second line under that one just add
**
**
That will add a break and the next line will be under the first one.
Example.
Welcome
To the lone wolf system
Apopka,FL That will show in the box like this….
<div align="center">
Welcome
To the lone wolf system
Apopka,FL
</div>

So you want to also add a picture and text?

If you need to add or want to add a picture and text, you add it below **</div>** like so. The <br> is to add a space between the lines.

</div>
</div>
</div>
</div>
<table class=gridtable width='52%' align='center'>
<tr><th colspan="7"><h3>**YOUR TEXT FOR THE BOX**</h3> </th></tr>
</div>
**
**
<center><img src="YOUR PICTURE NAME AND EXTENSION.jpg,.png" alt="ALTERNATE NAME CAN BE ANYTHING YOU LIKE" width="300" height="300">
<p><h3>TEXT UNDER THE IMAGE</h3></p>
You might have to adjust the **width and height** to suit your needs. Again you will have to experiment here.

I have 2 boxes and on the bottom one I also added a link to our Facebook page. To do so you add this. This is the same code as for the first box above so you can add this to that box instead of adding a second one.

<tr><th colspan="7"><h3>Shoot The Shack Fridays
 Every other Friday at 7PM EST. Join Us on the 411HUB for an informal NET. Every 2 weeks a different topic voted by the users on our
facebook
page.</h3></th></tr>
 The text will look like this.

Shoot The Shack Fridays
Every other Friday at 7PM EST. Join Us on the 411 HUB for an informal NET. Every 2 weeks a different topic voted by the users on our Facebook page.

The word Facebook will be the link and will show in blue.
THE WORD THAT WILL BE THE LINK OR WORDS END OF THE LINE.</h3></th></tr>

Remember to upload the image to your supermon directory if you are using an image.
